4 Read the following passage and answer the questions below :

The city of Petra, in modern-day Jordan, is one of the most famous archaeological sites in the world. Known as the "Rose City" because of the colour of the stone from which it is carved. Petra was the capital of the Nabataean kingdom around 300 BC. The Nabataeans were skilled traders who became very wealthy by controlling the trade routes that passed through the region. What makes Petra **unique** is its incredible architecture. The city's buildings, including tombs, temples, and a theatre, were carved directly into the high sandstone cliffs. The most famous structure is the Treasury, with its detailed facade. For centuries, Petra was hidden from the Western world, which is why it is also called the "Lost City." It was rediscovered in 1812 by a Swiss explorer. Today, Petra is a UNESCO World Heritage site and Jordan's most valuable tourist attraction, attracting visitors who come to admire its stunning beauty and rich history.

4 Read the following passage and answer the questions below :

Recycling is the process of converting waste materials into new materials and objects. It is a key part of modern waste reduction and is the third component of the "Reduce, Reuse, and Recycle" waste hierarchy. Recycling can prevent the waste of potentially useful materials and reduce the consumption of fresh raw materials, thereby cutting down on energy usage, air pollution, and water pollution. There are many materials that can be recycled, including paper, glass, plastic, and metal. Many communities have set up recycling programs to make it easier for people to participate. For example, some cities provide special bins for recyclable materials. While recycling is very **beneficial**, it's also important to reduce the amount of waste we create in the first place.
